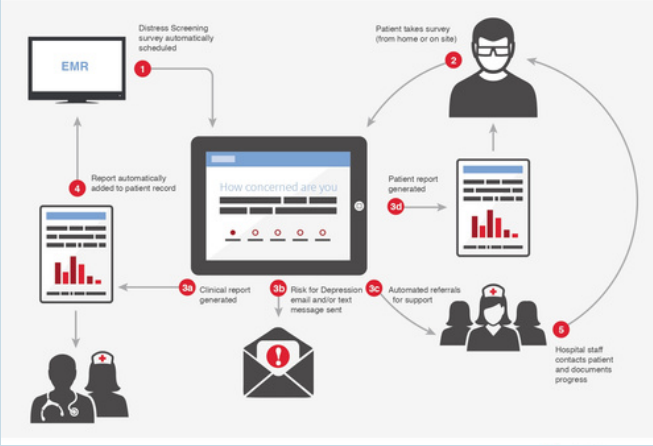
Digital Psychosocial Screening & Referral Programs

ONE PLATFORM, MULTIPLE SCREENERS

PATIENT - CAREGIVER - PEDIATRIC



Distress , Anxiety , Depression
Health Related Social Needs

Patient CSS 15+
Caregiver CSS-CG 18+

Cancer Support Source and Cancer Support Source - Caregiver are research-backed and **scientifically validated** digital distress screening & referral tools. The tools aim to rapidly identify and respond to unmet needs, better enabling the navigation of resources and treatment.

Real Time Analytics

Checking IN

Checking IN is an evidence-informed digital **pediatric distress screener** with optional EMR integration

Questionnaire developed by NIH NCI and NIMH combined with technology developed by the Cancer Support Community

Real Time Analytics

Health Related Social Needs

The HRSN is a screening tool created by the Centers for Medicare & Medicaid Services (CMS) to help identify social needs that are impacting patients' health outcomes. Cancer Support Community developed a digital version to include analytics and automated referrals based on needs endorsed.
